

MISTRIAL DECLARED IN MURDER CASE

Jury Deliberates 24 Hours
on Charge Against Ursula
Broderick

ST. LOUIS, April 3.—A mistrial was declared in the case of Ursula Broderick, 16 years old, charged with first degree murder for killing her step-father, J. F. Woodcock, who was shot to death in their home here, April 14, last. After deliberating for more than 24 hours, the foreman of the jury reported that the body was "hopelessly deadlocked." Judge Klene, presiding, then declared a mistrial and ordered the case re-tried on May 3.

The foreman stated that the jury had stood ten for conviction and two for acquittal since last night.

The defendant was apparently unmoved by the result and asserted that she was not worried as to the ultimate outcome when the case again goes to trial.

In October of 1916, Ursula shot and killed her father, Thomas P. Broderick, but was exonerated by a coroner's jury when it was testified that she fired in defense of her mother, who, Broderick, it was said, was beating.

The case went to the jury last night after Miss Florence McLaughlin testified the girl and her mother, Mrs. Lillian Woodcock, had offered her money to say she saw Woodcock strike advances towards Ursula. Mrs. Woodcock is charged with complicity in her husband's death and will be tried later.

Mrs. Florence Taylor, who resided with the Woodcocks, also testified that Mrs. Woodcock had urged her to declare Woodcock had attacked Ursula.

The girl maintained she shot Woodcock in defense of her honor, with a revolver purchased to take her own life in event he overpowered her in his alleged repeated attempts to assault her. She kept the weapon concealed in the folds of her garments, she explained.

The state contended Ursula and her mother plotted to murder Woodcock, and tried to show that he was shot while asleep.

On Saturday afternoon, May 1, District 1 of the Ogden Boy Scout organization will hold an open air rally under the direction of Hugh Holdaway, district deputy commissioner.

The program includes formation of a hollow square by the ten troops at the grand stand. While in that position, the flag will be raised and the scouts will give the pledge of allegiance. They will be inspected by Scout Executive George A. Gontes.

Scout Commissioner W. G. Kier and George W. Goddard, president of the Ogden council, later scout songs are programmed, then a fire building contest will be staged. Matches are barred.

Following the scouts will form a human tower for signaling purposes. After a rest period, they will resume the play and enter a first aid relay race, demonstrating the firemen's life and other first aid methods. A specially arranged tug of war will be carried, preceding an antelope race.

Concluding the program, the boys will form into three letters—B, S, A., signifying the Boy Scouts of America. While in the formation the flag will be lowered, the scout promise given and taps will be blown by one of the scout buglers. The affair will last from 2 until 5 o'clock.

Y. M. C. A. WORKERS
PUSHING DRIVE
IN OGDEN

B. M. Cherrington, international student secretary of the Y. M. C. A. in the intermountain division, and G. M. Wrisley, student secretary of the Y. M. C. A. at the Utah Agricultural college, were visiting Ogden in the interests of the campaign to raise \$2500 in the state of Utah for the budget of the work at the A. C.

Mr. Cherrington is a college friend of District Attorney S. P. Dobbs of this city.

"Despite the many appeals for funds throughout the state, we have met with real success in Salt Lake City and expect to raise the quota apportioned to the city of Ogden," said Mr. Wrisley this afternoon.

Bolsheviki Demoralize
Youth of Their Country

ROME, April 2.—The attitude of bolshevism toward the church is described in a letter received from Monsignor DeRopp, archbishop of Mohilev, printed in the Osservatore Romano. Monsignor DeRopp who only three months ago, through intervention by the Holy See was released by the bolsheviks, writes:

"Bolshevism, despite its ostentatious atheism does not prevent Christian work in churches, but there is a constant effort to demoralize the youth of the country. Their theory is that a child does not belong to the parents, but to the state. The church must struggle against the theory, and against this official organization if it hopes to survive in Russia. The church must insist on bolshevik recognition of her organization and of her rights as a legal entity. This is difficult, the cause the bolsheviks do not admit the right of possession, which, according to them, is vested only in the nation.

WHEAT GRADE RULES ALLEGED UNFAIR

Farmers Say Qualifications
Far Too Severe—Chicago
Board Raps Growers

CHICAGO, April 3.—More than 200 farmers, commission men and millers attended a hearing conducted by Secretary Meredith of the department of agriculture on alleged unfairness of specifications for wheat grades. Farmers asserted that specifications for No. 1 wheat, in which most of the trading is done at present, called for a grade so perfect that it was difficult to fill orders.

Harry N. Owen, who represented spring wheat growers in Minnesota and North and South Dakota, read a list of modifications requested by the states he represented. Mr. Owen said farmers were becoming discouraged because of high grain standards.

"The qualifications are far too severe," he said. "Unless something is done this year the farmers will plant only 60 per cent of the former acreage."

E. D. McLaughlin of the grain commission of the Chicago board of trade, denounced the request of the farmers as "unfair." "If the government grants these requests it will result in favoritism to the spring wheat grower, and confusion and disorder in trading will follow," he said.

A. L. Goetzmann, of La Crosse, Wis., president of the National Millers' Federation, charged that the present grading of spring wheat was low.

Maryland Wets Lose All Hopes of Success

ANNAPOLIS, April 3.—Ending the hopes of Maryland wets for any legislative relief at this session, the senate tonight by a vote of 16 to 11 killed the so-called Jones 3 1/2 per cent beer bill, which had the active support of Governor Ritchie.

The bill to permit Sunday moving picture shows in Baltimore was killed 15 to 12.

The measure authorizing Sunday sports has also been killed.

Suffragists Start Drive to Win Out in Delaware

DOVER, Del., April 3.—Undismayed by the defeat of the resolution to ratify the federal woman suffrage amendment by the lower house of the Delaware legislature, suffragist leaders today started a statewide drive in an effort to win over members of the legislature by changing the opinion of their constituents.

Headed by Mrs. Florence Hillis, president of the Delaware Suffrage association, a large delegation of suffragist workers started from here on a tour of the state.

Memorial Tablets in All Counties Proposed

WASHINGTON, April 3.—A joint resolution proposing an appropriation of \$1,000,000 for the erection of memorial tablets at various county seats in memory of American soldiers killed in the world war was introduced today by Senator Harding, Republican, Ohio. The tablets would bear the names of the soldiers from each county who lost their lives. The resolution was referred to the military committee.

OIL THE CAR THE RIGHT WAY

W. S. Cheesman, manager of the
Cheesman Automobile Company dis-
cussing proper lubrication for automo-
biles, in part said "This is the season
of the year when motorists get their
cars out of the winter hibernation and
begin looking them over and putting
them into shape for the summer tour-
ing—that is, if we ever get summer
sparks cleaned, tires put into
shape, and the car generally dolled up
at this time, therefore, it behooves
the car owner to go over the oiling
system thoroughly. The crank case
should be drained and cleaned. The
differential and transmission cases
should be thoroughly washed with
kerosene and refilled with clean new
oil, using, of course, the highest quality
and the grade best suited to the
particular car in question. Grease
and oil cups should not be neglected.
It is advisable to take all the old
grease from the cups, refill and turn it
down until the new has forced the old
grease out of the bearings. More or
less dirt, dust and other material are
bound to be collected in the oil and
grease if left in the garage all winter,
and the motor should not take any
unnecessary chances. Good clean oil
and grease is without a doubt the best
to keep any automobile in shape."

Continuing, Mr. Cheesman said: "There are very few engines that can efficiently use the same grade of cylinder oil in the winter as in summer. Oil becomes more viscous or sluggish in extreme cold weather and does flow so readily. For this reason," said Mr. Cheesman, "we have always advised automobile owners to use a lighter grade oil in cold weather. It is merely a matter of common sense to refer to the lubrication problem at this

time, as the particular brand of oil you use has a great deal to do with the life and healthy running of your motor. The particular brand of oil you use should be that designated by those who have for years studied the oil situation and demonstrated through long tests the proper and best lubrication, and the best method of using this lubrication. In most instances automobile owners use a quart or two of any old oil while on the road or it has been a habit with many of them to drive to a service station and order two quarts of oil not specifying the grade or the kind. This method of abusing your car is far more expensive than a little precaution in once establishing a brand of the proper grade of oil and sticking to it."

Mr. Cheesman was very emphatic when asked, "How often should the oil in a crank case be changed?" he said, "In winter it is absolutely necessary to establish the rule of changing the cylinder oil completely about every five hundred miles. In cold weather there is less likelihood of the motor fuel reaching the combustion chamber in properly vaporized condition, fully mixed with the air," Mr. Cheesman declared. "There is apt to be more or less gasoline in raw state carried along with the rest of the charge, and the more so because the use of the choke of a carburetor tends to send undiluted gasoline direct to the cylinders. Very likely the cylinder walls and combustion chambers are of a lower temperature than the fuel mixture, which results in the condensation of the fuel in the cylinder walls. This condensation eventually tends to work its way down into the crank case, there diluting the lubricating oil. And again, he continued, this is the more pronounced with worn engine, where the leakage between the cylinder walls is considerable. Often the oil gauge may be deceiving you into thinking the oil is all right merely because the level indicated sufficient. As a matter of fact," said Mr. Cheesman, "our experience has taught us that the mixture

used the same oil in their cars for years never allowing an old station employee to suggest or put in any kind of oil instead of Monogram, Mobile, or Quaker Slab are the three most successful oils now used in automobile lubrication.

Another thing," continued Mr. Cheesman, "The continual changing of different brands of oil has never been recommended by our company and as a result most of our customers have

of 1549, or 7.7 per cent over 1910. Logansport, Ind., 21,626, increase 2576, or 13.5 per cent. Connorsville, Ind., 9901, increase 2163, or 28.0 per cent. Lorraine, O., 27,295, increase 8412, or 29.1 per cent. Waukegan, Ill., 19,199, increase 3130 or 19.5 per cent. Pekin, Ill., 12,056, increase 2189, or 22.1 per cent. Millville, N. J., 14,691, increase 2210 or 18.0 per cent.

POPULATION STATISTICS.

WASHINGTON, April 3.—Population statistics announced today by the census bureau included:

Follow a Definite Policy

The oil in your automobile is like the sap in a tree—it gives life. With an inferior grade your motor will not develop its fullest power. Ogden's motoring headquarters has had long experience in automobile lubrication, and consequently is in a position to prescribe the oil your particular automobile ought to have.

Monogram Oil

Our experience, augmented by thorough tests proves to us that Monogram oil is superior by no other oil on the market. Guesswork is eliminated by keeping a supply always at your own garage—not allowing nondescript oil to be put in at every road service station—but by following a definite, systematic lubrication policy.

NECESSARY ACCESSORIES

The right kind of accessories plays an important role in providing comfort and pleasure when motoring. We have the largest and most complete stock of accessories between Denver and the Coast. Come to Ogden's motoring headquarters for the better kind of service and accessories.

Cletrac

TANK-TYPE TRACTOR

20 Horsepower at the pulley—12 at the drawbar

Does the work of 6 or 8 big horses. Small in size, but mighty in power. Design, plus material and workmanship, give the Cletrac stamina and ability for prolonged work almost unbelievable for a tractor of its size. Has proved its value and economy in all sorts of road and other construction duty. Low operating cost. Small upkeep expense.

Large roller track-wheel bearings. Dust-proof motor. Water air-clarifier. New tank-type, 8 inch wide, single-grouser track.

Let us arrange a practical demonstration for you. No obligation.
